The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 21-36 are rejected under the judicially created doctrine of double patenting over claims 1-16 of U. S. Patent No. 6,695,155 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: Claim 21 of application conflicts with claims 1-3 of patent (backboard, shelf, hanger), claim 22 of application conflicts with claim 5 of patent (projection), claim 23 of application conflicts with claim 4 of patent (embossments), claim 24 of application conflicts with claim 5 of patent (bottom, projections), claim 25 conflicts with claim 14 of patent (c-shaped channels), claim 26 conflicts with claim 6 of patent (detent), claim 27 conflicts with claim 7 of patent (shelf, upper and lower edges), claim 28 of application conflicts with claim 11 of patent (mounting holes), claim 29 conflicts with claim 12

of patent (upper shoulder and nose), claim 30 conflicts with claim 16 of patent (wrapper), claims 31-36 conflict with claims 1-16 as well for the same elements as recited above.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Similar ironing board holders are illustrated by Mathis 5,743,417; Ratliff et al. D386,864; Lehrman 5,570,642; Penny D353,247; Bejak et al. 4,893,770; Larkins 2,514,400; Vanderbilt 4,834,332.
